PRICING STRUCTURE

Service & Maintenance Costs

Call Out Fee & Hourly Rate

Austec Irrigation charges a Call Out Fee of \$132 including GST to attend onsite for the repairs/servicing of irrigation systems. The Call Out Fee covers travelling time, administration and the first 30 minutes on site after which Austec Irrigation charges an hourly rate of \$88 per man hour including GST plus parts.

The Call Out Fee should be regarded as a minimum charge for attendance on site and upon booking our services, you are accepting and agreeing to pay this fee.

If you have requested our services to attend onsite to service/repair an irrigation system and it is obvious to us that the repairs are extensive or that the system has reached its "use by date", Austec Irrigation will assess the system and provide you with an Irrigation Assessment and the charge will be appropriately adjusted. For further details refer to Irrigation Assessments below.

For Fixed Price Quotes to repair irrigation systems refer to Irrigation Assessments.

Irrigation Assessments

Price: \$198 GST inc (*properties up to 1000m²*)

Price: \$110/hour GST inc (*properties over 1000m²*)

Austec Irrigation will provide a written Irrigation Assessment on the repair of an existing irrigation system. This written Irrigation Assessment involves our Irrigation Technician attending on site in order to assess all components of the system including the controller, solenoid valves, submain, lateral pipe work, pop up sprinklers, garden sprays etc. If our Irrigation Technician is originally onsite for a Call Out Fee (refer above) the Call Out Fee will no longer be applicable and the Irrigation Assessment fee will apply.

From this site inspection we will then provide a written report including a recommendation and quotation for the repair and/or replacement of the irrigation system.

Quotes on Installing New Systems

Austec Irrigation provides free quotes to install new irrigation systems.

*Why go to a hardware store...
when you can go to an Austec Store!*
